Refine your home!
WHY DO OUR PARTNERS AND CUSTOMERS CHOOSE OUR COMPANY?

KAMROCK® is a leading manufacturer of the man-made veneer stone and decorative brick, as well as of other cladding materials and products for landscape design and garden decor.

KAMROCK® is acting since 1997 on the market, it was the first manufacturer of such products on the whole territory of CIS. During this time the company has gained popularity and a very good reputation among professionals of this sector: construction companies, distributors of construction materials, DIY-store chains, architects, designers.

KAMROCK® is a rock-solid industrial enterprise located on the territory of more than 5 ha, with its own developed infrastructure, which is essential for reducing production costs and for stable operation of the factory.

ADVANTAGES OF OUR PRODUCTS:

NATURALITY
Due to the high degree of texture and color imitation of natural materials you will hardly notice a difference between our cladding materials and their natural counterparts: stone, brick and even wood.

WEATHER RESISTANCE AND DURABILITY
Our products comply with strict requirements to their weather resistance and durability, so can be used almost in all climate zones no matter if it is hot air of Andalusia, wet winds of the Baltic coast or frosty and snowy atmosphere of Siberia!

LIGHT WEIGHT
2-3 times lighter than natural prototypes, which allows reducing the load on foundations and load-bearing structures.

HIGH STRENGTH
Due to the use of concrete instead of other raw materials our products can be used not only indoor, but also outdoor and have increased resistance to any external actions and adverse conditions.

REASONABLE PRICE WITHOUT COMPROMISE
We can compete even with nature – our hand-made cladding materials are considerably cheaper than their natural prototypes: natural stone, brick, wood.

CONVENIENT AND EASY TO INSTALL
Completely flat backside, ready tiles of various sizes, including corner elements – so it does not require special training and inviting skilled craftsmen for installation. Besides, our materials can be installed on various types of surfaces: wood, metal, brick, concrete; both indoor and outdoor.

EXTENSIVE PRODUCT RANGE
Our product range will meet any ambitious wish of any customer, so he could feel like a co-creator of his own living area. We try to be in line with regional decoration and architecture trends and are capable to produce new textures and colors suitable for each area and consumer's taste.

THE WIDEST RANGE OF APPLICATIONS
Our materials are suitable for facades and interiors, private and terraced houses, bars and cafes, landscape design and loft apartments.

### Refine your home

- to create an original design solution use combination of different colors or various collections
- pay special attention to color selection of grouting: due to its perception of the whole masonry can change
- when choosing a color of cladding materials, keep in mind that its perception can vary depending on the application (exterior or interior) and the type of lighting (natural or artificial)
- it’s possible to manufacture the products in any color scheme
- order a design project of facades and interiors with a choice of cladding materials and the preparation of a full package of technical documentation

### SPECIFICATIONS

1. **Wall decorative veneer products, made of concrete**
   - Compressive strength: not less than 60 MPa
   - Freeze-thaw resistance: F500
   - Water absorption: 3%
   - Average density: 2200 kg / cub.m
   - TU code: 6810 11 9000
   - HS code: 6810 11 9000

2. **Flagstones and elements for landscape design, made of concrete**
   - Compressive strength: not less than 60 MPa
   - Freeze-thaw resistance in salts: F300c
   - Abrasion capacity: 0.7 - 0.9 g / sq.cm
   - Water absorption: 4 - 9%
   - Average density: 2350 - 2400 kg / cub.m
   - TU code: 6810 19 3100
   - HS code: 6810 19 3100
